

# CeraSulfur<sup>®</sup>

The Natural Way to Safer Food

## CeraSulfur<sup>®</sup>

is a low dose micronized bio-sulfur fungicide that directly protects against powdery mildew type of fungi.

### Physical properties

Formulation	SC
Color	Light yellow
pH 1% in water	6.0 – 8.0
Density	1400 g/l
Suspensibility	> 80 %

### Intended uses

Powdery mildew on grape	( <i>Uncinula necator</i> )
Powdery mildew on tomato	( <i>Oidium lycopersicum</i> )
Powdery mildew on melon	( <i>Podosphaera xanthii</i> )
Powdery mildew on strawberry	( <i>Podosphaera aphanis</i> )
Scab disease on apple	( <i>Venturia</i> spp.)

## Benefits

1. Micronized elemental sulfur obtained from micro organisms
2. Provides direct protection against fungal diseases
3. Unique liquid formulation for excellent foliar application
4. Suited for integrated pest management programs and organic farming
5. Developed in collaboration with Wageningen University, the Netherlands

## Application Rate

2 – 10 l/ha CeraSulfur<sup>®</sup>

Active Ingredients	Content
Sulfur (biological S <sup>0</sup> )	700 g/l (50 %)
Inert ingredients	700 g/l
Total	1400 g/l
